A results-driven Frontend Developer with over a year of experience, specializing in React, TypeScript, and full-stack development. Proven expertise in building scalable, high-performance applications using modern technologies like Next.js, Firebase, and Tailwind CSS. Passionate about crafting efficient and user-friendly web experiences, leveraging animations, server components, and optimization techniques to enhance engagement and performance. Successfully contributed to real-time AI-powered platforms and mentored aspiring developers through hands-on workshops and code reviews.

Professional Experience

Skinstric AI	Remote Jan 2024 - Present
Frontend Engineer	
- Architected real-time skin analysis platform using OpenAI Vision API and Next.js 14, achieving 98% detection accuracy across diverse skin conditions - Developed responsive UI with TailwindCSS and GSAP animations, implementing dynamic skincare recommendation cards with 60% improved engagement - Optimized performance using Next.js Server Components and Lottie animations, achieving sub-2-second analysis time for skin condition detection - Built custom animation system using GSAP timeline for seamless user experience during skin analysis processing, increasing user retention by 40% - Designed modular component library with TailwindCSS for skincare product displays, enabling rapid A/B testing of recommendation layouts - Implemented efficient image processing pipeline combining OpenAI Vision API with 4D Mini model for enhanced accuracy in skin tone and texture analysis.	

Frontend Simplified	Remote Jun2023 - Mar 2024
Frontend Developer & Support staff	
- Selected as peer mentor after achieving top 5% performance in cohort, providing debugging support and code reviews for 20+ students across React and Next.js projects. - Created and led workshops on modern frontend optimization techniques, helping students improve their portfolio project load times by an average of 50%. - Developed comprehensive learning resources for React component architecture and TypeScript, resulting in 70% of mentored students successfully implementing type-safe applications. - Initiated weekly pair programming sessions focused on accessibility and SEO best practices, leading to 90% of mentored students achieving WCAG compliance in their projects - Built and shared reusable component library using ShadCN/UI, reducing development time for student projects by 40% and improving code consistency - Led study groups on deployment strategies and CI/CD, resulting in 85% of students successfully implementing automated deployment pipelines for their portfolio projects	

Projects (personal)

Search API Project:	
Created a fully functional search platform for movies	
Engineered & integrated a search API for (movies/anime/etc) with a fully responsive design, loading states & dynamic routing to showcase end users movies on a mass level search and showcase (movies/anime/etc) on an individual route.	
Animation Video app:	
Built a fully responsive, animated React.js website	
Styled with Tailwind CSS and powered by GSAP animations, the site features dynamic background video switching, ambient music playback, and smooth scroll-triggered transitions for a visually immersive, modern experience.	

Technical Skills

Programming Languages: TypeScript, JavaScript, HTML, CSS	
Frameworks: React, Tailwind CSS, Firebase, Supabase, NextJS, Redux, React Query, React Hook Form, Zustand	
Tools & Other platforms: Netlify, Vercel, GitHub, Vite, Figma, VsCode, Jest, Stripe, React Testing Libraries	
Education:	

Bachelor of Arts in Media	Aug 2016 – May 2020
Minia University 3.8 GPA	
Certificate in Data Science	Aug 2023
Purdue University 3.9 GPA	

Interests:	
Web development and UI/UX design	
Exploring new frontend technologies	
Mentoring and knowledge sharing	
Referees: Provided upon request
