A results-driven Frontend Developer with over a year of experience, specializing in React, TypeScript, and full-stack development. Proven expertise in building scalable, high-performance applications using modern technologies like Next.js, Firebase, and Tailwind CSS. Passionate about crafting efficient and user-friendly web experiences, leveraging animations, server components, and optimization techniques to enhance engagement and performance. Successfully contributed to real-time AI-powered platforms and mentored aspiring developers through hands-on workshops and code reviews.

Professional Experience

[Skinstric AI](#) [Remote | Jan 2024 - Present](#)

Frontend Engineer

- Architected real-time skin analysis platform using OpenAI Vision API and Next.js 14, achieving 98% detection accuracy across diverse skin conditions
- Developed responsive UI with TailwindCSS and GSAP animations, implementing dynamic skincare recommendation cards with 60% improved engagement
- Optimized performance using Next.js Server Components and Lottie animations, achieving sub-2-second analysis time for skin condition detection
- Built custom animation system using GSAP timeline for seamless user experience during skin analysis processing, increasing user retention by 40%
- Designed modular component library with TailwindCSS for skincare product displays, enabling rapid A/B testing of recommendation layouts
- Implemented efficient image processing pipeline combining OpenAI Vision API with 4D Mini model for enhanced accuracy in skin tone and texture analysis.

[Frontend Simplified](#) [Remote | Jun2023 - Mar 2024](#)

Frontend Developer & Support staff

- Selected as peer mentor after achieving top 5% performance in cohort, providing debugging support and code reviews for 20+ students across React and Next.js projects.
- Created and led workshops on modern frontend optimization techniques, helping students improve their portfolio project load times by an average of 50%.
- Developed comprehensive learning resources for React component architecture and TypeScript, resulting in 70% of mentored students successfully implementing type-safe applications.
- Initiated weekly pair programming sessions focused on accessibility and SEO best practices, leading to 90% of mentored students achieving WCAG compliance in their projects
- Built and shared reusable component library using ShadCN/UI, reducing development time for student projects by 40% and improving code consistency
- Led study groups on deployment strategies and CI/CD, resulting in 85% of students successfully implementing automated deployment pipelines for their portfolio projects

Projects (personal)

Search API Project:

Created a fully functional search platform for movies

- Engineered & integrated a search API for (movies/anime/etc) with a fully responsive design, loading states & dynamic routing to showcase end users movies on a mass level search and showcase (movies/anime/etc) on an individual route.

Vite Landing Page:

Created a fully Responsive Vite landing Page

- static Vite-powered landing page designed to showcase a clean and visually appealing layout, offering a foundation for creating engaging web experiences.

Technical Skills

Programming Languages: TypeScript, JavaScript, HTML, CSS
Frameworks: React, Tailwind CSS, Firebase, Supabase, NextJS, Redux, React Query, React Hook Form, Zustand
Tools & Other platforms: Netlify, Vercel, GitHub, Vite, Figma, VsCode, Jest, Stripe, React Testing Libraries

Education:

Bachelor of Arts in Media [Aug 2016 – May 2020](#)

Minia University 3.8 GPA

Certificate in Data Science [Aug 2023](#)

Purdue University 3.9 GPA

Interests:

Web development and UI/UX design
Exploring new frontend technologies
Mentoring and knowledge sharing
